ACADEMIC BACKGROUND

Federal Institute of Paraíba (IFPB) – Monteiro Campus
Technologist in Systems Analysis and Development

Oct 2024 - Jun 2027 (In Progress)

Federal Institute of Paraíba (IFPB) – Itaporanga Campus
Technical Degree in Information Technology

Jan 2020 - Dec 2023

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL
 - **Frameworks & Tools:** Spring Boot, React, Docker, Django, Git
 - **Databases:** PostgreSQL, MySQL
 - **Mobile Development:** Flutter
 - **Other:** Linux, Computer Networks, Virtualization, Scrum, Process Automation
- **Soft Skills:** Team Collaboration, Adaptability, Teamwork

PROFESSIONAL EXPERIENCE

Technical Support Intern — ZON Networks

Nov 2025 – Dec 2025

- Provided technical support to customers, diagnosing and resolving network and connectivity issues.
- Operated and managed network and user management systems, ensuring data accuracy and efficient ticket resolution.
- Acted as a liaison between customers and technical teams.

Volunteer — Extension Project “Projelógica”, IFPB Monteiro

Sep 2025 – Dec 2025

- Contributed to a project promoting computational thinking for 9th-grade public school students.
- Delivered hands-on workshops using Scratch to develop logic, creativity, and problem-solving skills.

Volunteer — Extension Project “Byte Solidário”, IFPB Monteiro

Sep 2025 – Dec 2025

- Trained socially vulnerable teenagers in digital literacy, including productivity tools, email, cloud usage, safe browsing, and digital citizenship.
- Helped plan activities, provided technical and educational support, and encouraged interest in technology careers.

Automation Intern — Real Estate Registry Office (2nd Registry Office)

Apr 2024 – Nov 2024

- Developed Python automations to digitize and convert large image datasets (JPG → TIFF), improving processing speed by 70%.
- Increased workflow efficiency through custom scripts and process automation.

IT Support and Development Intern — LaISER Laboratory, IFPB Itaporanga

May 2023 – Feb 2024

- Created Python scripts to automate internal administrative tasks.
- Managed network infrastructure and servers, and provided end-user technical support.
- Contributed to the development of institutional systems and applications.

Volunteer — Extension Project “Visual3D”, IFPB Itaporanga

Aug 2023 – Oct 2023

- Configured networks and infrastructure for Virtual and Augmented Reality applications.
- Assisted in deploying immersive educational environments.

PROJECTS

Document Automation System (Python)

- Automated batch image reading and conversion (JPG → TIFF), significantly improving data digitization speed.

IFit — Gym Assessment System (Python, Django, PostgreSQL, Machine Learning)

- Developed a complete physical assessment system integrating Machine Learning for predictive fitness progress analysis.

Library Management System (Java, Swing, JSON)

- Built a desktop application for book loan management with JSON-based data persistence.

Heap Task Manager (Java)

- Implemented a priority-based task scheduling system using a MaxHeap structure.
-

CERTIFICATES

React: Building Dynamic and Interactive Single Page Applications (IFRS)	Oct 2025
Scrum: Managing Software Projects with Agility (IFRS)	Oct 2025
Taking Your Local Server to the Internet: The Magic of Ngrok (IFPB)	Sep 2025
AWS Cloud Services (IFPB)	Dec 2024
Docker: Your First Container (IFPB)	Dec 2024

LANGUAGES

- **Portuguese** — Native
